

US EPA ARCHIVE DOCUMENT

Instructions:

Please enter data from the appropriate year into the reporting template. For example, if you are reporting 2013 data in 2014, please use the 2014 template. If your data is collected on a fiscal year basis, please input the fiscal year data that most closely aligns with each calendar year reporting period (and be sure to always be consistent in how fiscal year data is reported).

If you do not have any data to report or share please select "I don't have this information". This will give a more accurate reporting for each State based on calendar or fiscal year.

Definitions are provided through links to a [Data Dictionary \(View\)](#) and [Materials Flow Diagram \(View\)](#).

If you are unsure about how to answer a question or have other concerns about this template, please contact a member of the [implementation team \(View\)](#) who are coordinating this project or the Project Manager Kent Foerster foerster.kent@epa.gov. A comment box is provided at the end of each question. Use this box to clarify any response, identify any concerns you have about the question or to make suggestions for improvements or expansion to that question for next years template.

By filling out this template, you acknowledge and agree to allow your data to be shared with other State governments and the U.S. EPA.

The plus icon indicates no data has been entered into the template page.

To edit or update your response on any of the template pages, click the corresponding green check mark .

An asterisk * following a question indicates that a response is required. If a mandatory question has not been filled out an error will show and the question will need to be edited and/or completed.

Once you are satisfied with all your responses to each question on all pages you may "submit to program" and your response will be locked allowing for no further editing.

NOTE: new reports for sharing 2013 data will be available after January 1 2015.

Additional Notes/Comments:

1b. Transfer Station Tonnage

I would like to provide detailed non-hazardous waste transfer station tonnage information: *

- ☒ Yes
- ☐ No, only a total transfer station number
- ☐ I don't have this information

Tonnage will not be counted in disposal figures in analytical reports

Solid Waste Flowing Through Transfer Stations (In-State & Out-of-State)

	WASTE MATERIAL *	TONS: <i>note, you can add up to 25 rows of data</i>

Additional Notes/Comments:

3. Municipal Solid Waste Disposal Facility Information

Municipal Solid Waste Disposal Facility Ownership

Public

I would like to provide detailed public municipal solid waste disposal facility information: *

- ☒ Yes
- ☐ No, only a total public municipal solid waste disposal facility number
- ☐ I don't have this information

Refers to landfill and waste-to-energy facilities

Local Government owned municipal solid waste disposal facilities:

Authority or District owned municipal solid waste disposal facilities:

Private

I would like to provide detailed private municipal solid waste disposal facility information: *

- ☒ Yes
- ☐ No, only a total private municipal solid waste disposal facility number
- ☐ I don't have this information

Refers to landfill and waste-to-energy facilities

National company owned municipal solid waste disposal facilities:

Regional company owned municipal solid waste disposal facilities:

In-state company owned municipal solid waste disposal facilities:

Additional Notes/Comments:

4. Energy Recovery

I would like to provide detailed energy recovery tonnage information: *

- ☒ Yes
- ☐ No, only a total disposal number
- ☐ There are no energy recovery facilities in my state
- ☐ I don't have this information

Energy recovery is tonnage generated within state and includes out-of-state generated tonnage

TYPE OF FACILITY	NUMBER OF FACILITIES	TONS CONVERTED	ENERGY PRODUCED (MWH)
Waste to Energy			
Pyrolysis			
Gasification			
Anaerobic Digesters

Additional Notes/Comments:

5a. Diversion by Recycling

Diversion: activities surrounding the handling of recovered resources such that they are not disposed of in landfills, waste piles, surface impoundments, land application units on a permanent or long-term temporary basis; and are not incinerated or converted to fuel energy, or base chemicals through combustion, pyrolysis, gasification, or other conversion technologies. Diversion can be attributed to several processes where materials are systematically redirected from disposal: **Recycling**, **Reuse**, **Beneficial Use**, and **Composting**. Each of these four processing forms of diversion are defined in a way that make them mutually exclusive to one another, yet a total diversion metric can be calculated by adding the amounts from all four processes together.

I would like to provide detailed recycling tonnages: *

- ☒ Yes
- ☐ No, only a total recycling tonnage number
- ☐ I don't have this information

Recycling is tonnage collected within state by all collection programs
